Aspiring Software Developer | CS Engineering Student | Web, AI & Mobile App Enthusiast

Computer Science Engineering student at [Your University], Delhi, with hands-on experience in web development, Android app development, and AI-powered application building through prompt engineering. Passionate about solving real-world problems — from rural healthcare accessibility to personality development — through innovative software solutions. Currently learning Machine Learning and Neural Networks to expand expertise at the intersection of software and AI.

Education

Indira Gandhi Delhi Technical University For Women

New Delhi, India

B.Tech Computer Science & Engineering

Jul 2025 – Jul 2029

Kendriya Vidyalaya

Delhi, India

Secondary & Senior Secondary Education

Mar 2012 – Mar 2024

Projects

HealthBridge — Rural Healthcare Web Platform | TypeScript, React, Node.js

[Hackathon / Personal]

- Built a full-stack web platform to bridge the rural healthcare gap, addressing four core pillars: resilience, proactivity, accessibility, and real-time monitoring.
- Designed and implemented a scalable frontend using TypeScript and React, with a focus on low-bandwidth usability for rural users.
- Leveraged prompt engineering and LLM APIs to power intelligent, context-aware health advisory features within the platform.

AURA — Android Soft Skills & Personality Development App | Kotlin, Android Studio

1st Year Project

- Designed and developed a fully functional Android mobile application focused on soft skills development and personality growth, built during the first year of engineering.
- Integrated AI-driven personalized coaching flows using prompt engineering techniques and LLM APIs to deliver adaptive learning experiences.
- Implemented clean Android architecture using Kotlin, managing UI states and user session flows in Android Studio.

Hackathons & Achievements

Delhi AI Grind

Government of Delhi, India

District Level Qualifier –Runner Up

2025

- Qualified at the district level in Delhi AI Grind, a government-organised AI competition, competing against participants across Delhi.

AM Hacks 2.0 (AssetMerkle – IGDTUW)

New Delhi, India

Top 20 Finalist

2025

- Ranked in the Top 20 out of all competing teams in a competitive hackathon organised by AssetMerkle at IGDTUW, New Delhi.
- Contributed to rapid prototyping and solution development under time constraints, demonstrating strong problem-solving and teamwork skills.

Technical Skills

Web Development: HTML, CSS, JavaScript, TypeScript, React, Node.js

Mobile Development: Android (Kotlin), Android Studio

AI & Prompt Engineering: LLM APIs, Prompt Design, AI-powered App Development

Machine Learning (Learning): Python, NumPy, Neural Networks, Scikit-learn

Core Concepts: Data Structures & Algorithms, OOP, REST APIs, Git & GitHub, Agile Development
